

## Installation of Monitor Shelf Sub-Assembly

Locate the following parts:

(1) bag D2 hardware  
(1) pc D1 Rear Stiffener and (1) bag D3 hardware (only if you purchased the "Sit or Stand" option)

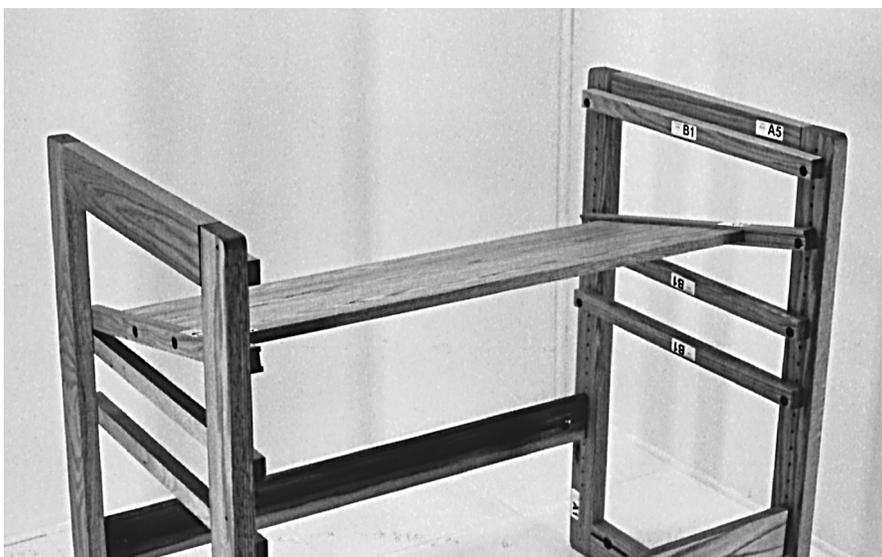

Refer to the Monitor Shelf height(s) figure determined on page 1B.

Note: If you purchased the "Sit or Stand" option, you will have (2) Monitor Shelf Assemblies to install: (1) for sitting, and (1) for standing.

Slide Monitor Shelf Assembly into the Desk, and let it rest on the top most Stationary Slide.

Assembly can be reversed from that shown to allow computer monitor to be positioned closer to the user if so desired.

Lift up front of the Monitor Shelf Assembly, and attach it to the Front Legs as shown. Use screws and washers from the D2 hardware bag. Snug screws up but do not tighten yet.

Wax Screw prior to insertion.
